Restriction/Election

1. Restriction to one of the following inventions is required under 35 U.S.C. § 121:

I. Claims 1-14, drawn to the eyeglasses with an audio file storage and playback device, classified in Class 381, subclass 381.

II. Claims 15-20 and 24-29, drawn to the eyeglasses with first and second acoustic transducers supported by the first and second adjustment devices, classified in Class 381, subclass 150.

III. Claims 21-23, drawn to the temple with a button extending from the aperture, classified in Class 351, subclass 111.

The inventions are distinct, each from the other because of the following reasons:

Each of the invention, I, II and III, recites limitations not recited in any of the other invention. The differing limitations make the inventions I, II and III patentably distinct from one another, i.e. a reference that anticipates or makes obvious one of the inventions I, II and III would not, by itself, anticipate or make obvious any of the remaining invention.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
